Title: Scientist, Clinical Testing & Claims Substantiation

Passion for Brands, Passion for People

Beiersdorf is a global market leader in consumer skin care and medical products with well known brands such as NIVEA, Eucerin and Aquaphor. With global headquarters in Hamburg, Germany and 150 worldwide affiliates, we produce and market the highest quality branded products with superior consumer benefit, reliability and safety. At Beiersdorf, we focus on one goal: meeting consumers' needs. Every day. Throughout the world.

Beiersdorf Inc, the US affiliate, is headquartered in Wilton, CT. We employ diverse, highly talented, ambitious people who make an impact with their work every day. Our dedicated team is passionate and motivated, sees issues as opportunities, and embraces and enables positive change. We operate in a lean and transparent organizational structure that promotes cross-functional collaboration and teamwork.

RESPONSIBILITIES:

Support the product testing and claim substantiation activities for new product launches, and currently marketed US products. Work with others in the US, global R&D and Marketing groups, outside clinical research organizations and other vendors regarding clinical testing procedures and claims.

1. Research and understand the skin care category product claims.
2. Become an expert in the BDF product line, claims, and testing methodologies.
3. Coordinate and track external testing activities.
4. Prepare and review testing protocols, test reports and any other needed study documents.
5. Evaluate findings, organize and summarize data in tables, graphs and other impactful, understandable formats.
6. Participate in preparing claim support packages for advertising substantiation.
7. Conduct scientific literature searches, identify relevant support materials, and summarize scientific literature.
8. Prepare documents summarizing technical information for both technical and consumer audiences.
9. Prepare organized scientific presentations to support existing products and new product launches, communicating relevant scientific background, product attributes and benefits.
10. Communicate effectively and regularly with supervisor on project status and activities; communicate effectively with others in cross-functional teams and meetings.
11. Perform other duties and projects as assigned.
