

PERFORMANCE MATERIALS

Chemist Applications Lab.

DKSH The number 1 market expansion service company in and for Asia, has an immediate opening for an applications chemist.

The position is responsible for:

- Developing, formulating, and stability testing all types of cosmetic products including creams, lotions (o/w & w/o), shampoos, conditioners and some make-up products;
- Coordinate and communicate with overseas applications labs in Europe and Asia
- Training sales staff on formulating with new cosmetic products including all skin care cosmetics, hair care, and personal care systems;
- Evaluation of new raw materials for existing and new unique products.
- Operation and maintenance of standard laboratory instrumentation; record keeping.
- Technical service to our customers as needed.
- A scientific curiosity to explore, evaluate, and develop new products, technologies and or applications will be necessary.

The successful candidate will possess a B.S. in science. Approx 3- 5 years related experience and/or training; or equivalent combination of education and experience. A strong background in the Personal Care Industry along with a solid foundation in formulation knowledge, market familiarity, and some knowledge of cosmetic regulations is required.

DKSH generates annual gross revenues of more than CHF 8,700 million and employs over 22,000 specialized staff incorporating no less than 48 nationalities. The Group operates in 35 countries through a coordinated network of 440 business locations across Asia and another 15 in Europe and the Americas
