

Lab Manager for Home & Personal Care Claims Testing

TRI/Princeton, an independent research institute, is currently seeking an experienced LAB MANAGER with supervisory experience, including laboratory project management, implementation of laboratory procedures and client management. The LAB MANAGER will be a key contributor to the contract research and testing projects performed by the Institute for our worldwide clients in industry, government and academia.

The ideally qualified candidate will:

- Possess a BS or MS degree in a qualified science or engineering field.
- Have at least 5 years industrial experience using analytical chemistry and/or physical testing techniques in practical applications demonstrating creativity and good problem solving traits.
- Have demonstrated success as a team leader with the ability to supervisor junior staff; prioritize and manage multiple projects simultaneously; and effectively schedule personnel and equipment to optimize lab efficiency.
- Be capable of performing all standard methods personally; develop new methods as required and take responsibility for training staff in such methods.
- Review and analyze all data acquired and authorize its release.
- Design studies based on client needs; properly communicate project status; and deliver results to clients through direct phone contact and written final reports.

TRI/Princeton provides an opportunity for personal entrepreneurial development in an atmosphere of intellectual curiosity, a visionary and evolving approach to both science and collaborations with a keen eye on the reduction to practice of applications of value to society, both commercially and intellectually. Interested candidates should submit a resume and cover letter to labmanager@triprinceton.org. For more information, please visit www.triprinceton.org. TRI/Princeton is an equal opportunity employer.
